PART (C).

PERSONS EMPLOYED, SALARIES AND WAGES PAID AND OTHER CONTRIBUTIONS MADE TO EMPLOYEES DURING THE YEAR ENDING 31ST DECEMBER, 19 .

Instructions for filling up this Part.

(*a*) Particulars in the table below should relate to employees engaged in work connected directly or indirectly with the manufacture of the output as shown in Part (F). All administrative, technical and clerical staff should be included. Employees engaged in effecting delivery of the output should also be included, but persons employed in any retail sales organization maintained by the factory should be excluded. If the factory carries on any merchanting trade (*i.e.*, sale of goods which were not subjected to any manufacturing process but merely bought and re-sold in the same condition as received), persons engaged in that part of the business should also be excluded.

(*b*) (*i*) The total number of man-hours worked during the year should be obtained by adding the total number of man-hours worked on each day on which the manufacturing processes were carried on in the factory. The total number of man-hours worked on any day on which the manufacturing processes were carried on in the factory should be obtained by multiplying the total attendances during each shift by the number of hours that shift was worked and adding the product so obtained for all shifts worked on that day.

(*ii*) Entries in column (2) against each of the side-headings 'men', 'women', 'boys' and 'girls' under "Workers" should be worked out in the manner described in paragraph (*b*) (*i*), but based on the attendances of 'men', 'women', 'boys' and 'girls' respectively.

(*c*) The average number of persons employed per day [column (3)] should be worked out by dividing the aggregate total attendances on all working days by the total number of working days during the year. In reckoning attendances, attendances by *budli* or substitution and temporary as well as permanent employees should be counted. Total attendances should be arrived at by taking the aggregate of daily attendances in respect of all working days. Absence for hours only need not be considered. Total attendances on any day should be the total of the attendances on each shift worked during that day. Days on which the factory was closed for whatever cause and days on which the manufacturing processes were not carried on should not be treated as working days.

(*d*) Entries in column (4) should include salaries and wages, cost of living or dearness allowances, overtime earnings and other additional payments. For the purpose of entries in this column no deductions from salaries and wages should be made in respect of items

*If the accounts of the factory are closed more than once in an accounting year, all the dates on which they are closed should be given here; for example, if accounts are closed six-monthly, the dates of both six-monthly closings should be given.

†State here whether 'higher than', 'equal to' or 'lower than', as the case may be.

‡Under this heading should be included all other items of working capital, as, for example, (*a*) cash in hand and at banks, (*b*) stocks of partly finished products, (*c*) net balance (*plus* or *minus* as the case may be) obtained after deducting the total of credit items from the total of debit items. The credit items should be items like debts due to the factory, advances by the factory against goods or to employees, bills of exchange payable to the factory and the debit items should be items like amounts due for goods supplied to the factory, loans and bills of exchange payable by the factory.

specified under clauses (*d*) to (*j*) of sub-section (*2*) of section 7 of the Payment of Wages Act, 1936. The remuneration to a proprietor should be included only if he is actively engaged in the business of the factory and then only to the extent to which it is paid in lieu of salary or wages. His share of the profits of the business should not be included.

(*e*) If for the purpose of entries in column (5), separate figures for each of the side headings in column (1) are not available, the total money value of the privileges, benefits or contributions may be entered in the space provided for 'total'. The items of privileges or benefits or contributions included should be specified at the top of column (5).

(*f*) (*i*) "Worker" means a person employed for wages in any manufacturing processes or in cleaning any part of the machinery or premises used for the manufacturing processes, or in any other kind of work whatsoever incidental to or connected with the manufacturing processes or connected with the subject of the manufacturing processes, but does not include any person solely employed in clerical capacity in any room or place where no manufacturing process is being carried on [see also paragraph (*a*) above].

(*ii*) "Persons other than workers" should include all employees not covered by the term "worker" as defined in paragraph (*f*) (*i*), including clerical, administrative and technical staff, whether working in the factory premises or any other place and whose salaries and wages are debitable to the factory's account [see also paragraph (*a*) above].

(*g*) "Adult" means a person who has completed the seventeenth year of age. The expression includes any person who has completed the fifteenth but not the seventeenth year of age and has been certified to be an "adult" under the Factories Act, 1934.

(*h*) "Child" means a person who has not completed the fifteenth year of age and includes any person who has completed the fifteenth but not the seventeenth year of age and has not been certified to be an "adult" under the Factories Act, 1934.

(*i*) Particulars relating to "workers" employed through contractors should be entered as far as they are available with the person submitting the return. If no particulars relating to "workers" employed through contractors are available, the entries against the side heading 'Employed through contractors' should be "not available" in the relevant columns.

(*j*) If any class of "workers"—'men', 'women', 'boys' and 'girls'—was not employed during the year, the entry against that class of workers in columns (2) to (5) should be 'nil'. Spaces in columns (2) to (5) should not be left blank against any side-heading. Figures in columns (4) and (5) should be entered to the nearest rupee. Fractions should be omitted.

Instructions for filling up this Part.

(*a*) *Fuel, electricity, etc., consumed in the year.*—In the table below should be stated the quantity and purchase value of each item of fuel, of electricity and of other specified items consumed during the year. Only fuel, electricity, etc., which was *purchased* whether during the year or earlier, should be included. Fuel, electricity, etc., produced in the factory should not be included. If the amounts are not directly available from the books of the factory it should be noted that the amounts should cover actual purchases of each item effected during the year *plus* stocks at the beginning of the year and *less* stocks at the end. The value of the stocks at the beginning and at the end of the year should be taken at the book value. Purchases made during the year should include fuel, electricity, etc., acquired from allied concerns. The purchase value of such transactions should be taken as equal to the value entered in the books of the factory in respect of which this return is made.

(*b*) *Purchase value.*—For the purpose of determining the purchase value of the quantity of each item of fuel, of electricity and of other items specified in the table, consumed during the year, the purchase value of the quantity purchased during the year should be taken as equal to the cost of the article landed at the factory, or of the electricity transmitted to the factory, *i.e.*, any expenses incurred in transporting the article to the factory should be added to the payment made to the seller unless transport was carried out by the factory's own staff. If any duty was paid by the factory, it should also be added to the cost.

(*c*) Electricity generated or coal gas produced at the factory, if consumed in the factory, should not be included. If any electricity generated or coal gas produced is sold to any person or transferred to allied concerns not covered by this return, such electricity or coal gas should be regarded as a product and its ex-factory net selling value should be included in Part (F).

(*d*) If any quantity of any article specified in this table was sold in the same condition as bought, particulars relating to it should be excluded from the table.

(*e*) If any item mentioned in column (1) of the table below was not consumed by the factory during the year covered by this return, the entry against it should be 'nil'. Spaces in columns (3) and (4) should not be left blank against any item.

(*f*) Quantity should be stated to the nearest unit specified for each item and purchase value should be stated to the nearest rupee. Fractions should be omitted.

PART (E).

MATERIALS PURCHASED AT ANY TIME AND CONSUMED DURING THE YEAR ENDING 31ST DECEMBER 19 , IN THE MANUFACTURE OF PRODUCTS AND BY-PRODUCTS MADE FOR SALE AND WORK GIVEN OUT DURING THE SAME YEAR.

Instructions for filling up this Part.

(*a*) *Materials consumed in the year.*—In the table below should be stated the quantity and purchase value of each material [other than those specified in Part (D)] consumed during the year in the manufacture of products and by-products made for sale [as shown in Part (F)]. The table should cover all consumable stores. Only materials which were *purchased*, whether during the year or earlier, should be included. Materials made in the factory should not be included. If the amounts are not directly available from the books of the factory it should be noted that the amounts should cover actual purchases of each material effected during the year *plus* stocks at the beginning of the year and *less* stocks at the end. The value of stocks at the beginning and at the end of the year should be taken at the book value. Purchases made during the year should include materials acquired from allied concerns. The purchase value of such transactions should be taken as equal to the value entered in the books of the factory in respect of which this return is made.

(*b*) *Purchase value*—

(1) For the purpose of determining the purchase value of the quantity of each material consumed during the year for the manufacture of products and by-products made for sale, the purchase value of the quantity of material purchased during the year should be taken as equal to the cost of the material landed at the factory, *i.e.*, any expenses incurred in transporting the material to the factory should be added to the payment made to the seller of the material unless transport was carried out by the factory's own staff. If any duty was paid by the factory, it should also be added to the amount paid to the seller.

(2) If additions specified in paragraph (*b*) (1) to the amount paid to sellers are not available separately for each material, the amount paid to the sellers may be included in the figure of purchase value entered in columns (4), (6) and (8). If this procedure is adopted, (*a*) it should be clearly stated at the top of these columns that the additions specified in paragraph (*b*) (1) have not been made, and (*b*) the following information *must* be furnished in the space provided for the purpose at the bottom of the table (item VII):—

(*i*) Names of items which should be added [see paragraph (*b*) (1) above] to the amount paid to sellers in order to arrive at the purchase value and which are not included in the value as entered, and

(*c*) *Exclusion of merchanted goods.*—Particulars relating to goods which were not subjected to any manufacturing process but were merely bought and re-sold in the same condition as received, should be excluded from the table

(*d*) *Work given out to other firms or factories (item VI in the table).*—The total amount paid to other firms or factories for work done on materials given out to them *plus* transport and any other charges incurred on these goods should be shown against this item

(*e*) If a material listed in column (1) was not consumed by the factory, the entry against it should be 'nil'. Spaces in columns (3) to (8) should not be left blank against any item of material listed in column (1). Similarly if no payment was made to other firms or factories for work done on materials given out to them (item VI in the table), the entry against this item should be 'nil'. The space against this item also should not be left blank.

(*f*) Quantity should be stated to the nearest unit specified for each material and purchase value should be stated to the nearest rupee. Fractions should be omitted.

PART (F).

PRODUCTS AND BY-PRODUCTS MADE AND WORK DONE DURING THE YEAR ENDING 31ST DECEMBER 19 .

Instructions for filling up this Part.

(*a*) *Products and by-products made in the year for sale.*—In the table below should be stated the quantity (including the quantity made against specific orders) and ex-factory net selling value of each product and by-product *made in the year of return for sale*, whether sold in that year or held in stock for sale during a subsequent period. If these amounts are not directly available from the books of the factory, it should be noted that the amounts should cover the actual sales of each product and by-product effected in the year *plus* stocks at the end of the year and *less* stocks at the beginning. The value of stocks at the beginning and at the end of the year should be taken at the book value. The ex-factory net selling value should include cost of packing materials used (except the cost of returnable cases or other packing). The weight of packing materials should not, however, be included in the figures of weight of products and by-products. Sales effected during the year should include any transfers of products and by-products made to allied concerns or any Government or semi-Government agencies and credit for whose value was secured by book adjustment. Ex-factory net selling value of each transaction should be taken as equal to value entered in the books of the factory in respect of which this return is made.

(*b*) *Ex-factory net selling value*—

(1) For the purpose of determining the ex-factory net selling value of the quantity of each product and by-product made in the year of return for sale, the value of sales to be taken into account should be the amount charged to customers *less* (*i*) discounts or rebates, allowances for returnable cases or other packing and any other drawbacks allowed to customers and (*ii*) payments to transport firms, railways, etc., for carriage outwards. Charges made for delivery when delivery is carried out by the factory's own staff should not be deducted.

(2) If deductions specified in paragraph (*b*) (1) from the amount charged to customers are not available separately for each product and by-product, the amount charged to customers may be included in the figure of value entered in column (4). If this procedure is adopted, (a) it should be clearly stated at the top of column (4) that deductions from the amount charged to customers specified in paragraph (*b*) (1) have not been made, and (b) the following information *must* be furnished in the space provided for the purpose at the bottom of the table (item VIII):—

(*i*) Names of items which should be deducted [*see* paragraph (*b*) (1) above] from the amount charged to customers in order to arrive at the ex-factory net selling value and which are included in the value as entered, and

(*ii*) The total amount which should be deducted from the value of products and by-products as entered in column (4) in order to arrive at the ex-factory net selling value.

(3) If any product or by-product is not made for sale but for transfer to an allied concern or undertaking and its ex-factory net selling value cannot be given as required above, the value of such product or by-product should be estimated on the basis of materials or parts used or worked up in its manufacture together with due allowance for cost of labour expended on it, general charges and profits allowed, if any.

(*c*) *Electricity generated and coal gas produced at the factory and sold.*—Any electricity generated or coal gas produced at the factory and sold to any person or transferred to allied concerns should be regarded as a product and should be included in the entry against the heading "All other products (value only)" under item "I. Products" of the table.

(*d*) *Exclusion of merchanted goods.*—Particulars relating to goods which were not subjected to any manufacturing process but were merely bought and re-sold in the same condition as received, should be excluded from the table below.

(*e*) *Repair work and servicing (item III).*—The amounts charged for repair work done during the year should be shown against these headings under this item, *exclusive of the value of any goods made by the factory and used in the work*, which should be entered against the headings provided for such goods.

(*f*) *Work done for other firms or customers on material supplied by them (item IV).*—The total amount received for the work *less* (*i*) discount or rebates and other drawbacks allowed to customers, and (*ii*) payments to transport firms, railways, etc., for carriage outwards should be shown against this item.

(*g*) *Work in progress at the end and at the beginning of the year (items V and VII).*—For the purpose of determining the total output attributable to the year covered by this return, account must be taken of the value of work in progress including repair work, if any, at the end and at the beginning of that year. In both cases the value should be estimated on the basis of materials or parts used or worked up in the construction of plant and machinery, cost of labour expended on them, together with due allowance for general charges and profits.

(*h*) If a product or by-product listed in column (1) was not made by the factory, the entry against it should be "nil". Spaces in columns (3) and (4) should not be left blank against any item of product or by-product listed in column (1). Similarly, if no income accrues to the factory under any of the heads listed in items II, IV and V, the entry against it should be 'nil'. The spaces against this item also in column (4) should not be left blank.

(*i*) Quantity should be stated to the nearest unit specified for each product and by-product and value should be stated to the nearest rupee. Fractions should be omitted.

If the accounts of the factory are not closed on that date and if it is inconvenient to work out the figures as on that date, all particulars may be given as on the date on which the accounts of the factory were last closed. In either case the date to which the particulars refer and the accounting year of the factory should be clearly stated in the space provided at the top of the table in items (1) and (2).

(*c*) 'Value' in all the headings specified under item "II. Productive capital employed" should be taken to mean value according to the books of the factory on the date to which the particulars furnished in this Part relate. For items of fixed capital this will invariably be the original cost *plus* the cost of improvements made and *less* amount written off. If the factory occupies only a portion of any building or any piece of land, particulars relating to only that portion should be included in the table. If any item of fixed capital [items II (1) (*i*) to II (1) (*iii*)] has been leased or rented, the rent paid should be shown separately in the column provided for this purpose [column (3)] against these items. If any lump sum consideration was originally paid for securing the lease or for renting the item of fixed capital in question, the present book value of the amount originally paid should be included in the amount to be entered in column (2) against the appropriate heading.

(*d*) It should be clearly indicated in item (3) at the top of the table whether book value of fixed capital items as entered in the table has been arrived at by writing off depreciation in respect of the year immediately preceding the date to which the particulars relate at a rate higher than, equal to or lower than the rate of depreciation prescribed under section 10 (2) (*vi*) of the Indian Income-tax Act, 1922.

PERSONS EMPLOYED, SALARIES AND WAGES PAID AND OTHER CONTRIBUTIONS MADE TO EMPLOYEES DURING THE YEAR ENDING 31ST DECEMBER, 19 .

Instructions for filling up this Part.

(*a*) Particulars in the table below should relate to employees engaged in work connected directly or indirectly with the manufacture of the output as shown in Part (F). All administrative, technical and clerical staff should be included. Employees engaged in effecting delivery of the output should also be included, but persons employed in any retail sales organization maintained by the factory should be excluded. If the factory carries on any merchanting trade (*i.e.*, sale of goods which were not subjected to any manufacturing process but merely bought and re-sold in the same condition as received), persons engaged in that part of the business should also be excluded.

(*b*) (*i*) The total number of man-hours worked during the year should be obtained by adding the total number of man-hours worked on each day on which the manufacturing processes were carried on in the factory. The total number of man-hours worked on any day on which the manufacturing processes were carried on in the factory should be obtained by multiplying the total attendances during each shift by the number of hours that shift was worked and adding the product so obtained for all shifts worked on that day.

(*ii*) Entries in column (2) against each of the side-headings 'men', 'women', 'boys' and 'girls' under "Workers" should be worked out in the manner described in paragraph (*b*) (*i*), but based on the attendances of 'men', 'women', 'boys' and 'girls' respectively.

(*c*) The average number of persons employed per day [column (3)] should be worked out by dividing the aggregate total attendances on all working days by the total number of working days during the year. In reckoning attendances, attendances by *budli* or substitution and temporary as well as permanent employees should be counted. Total attendances should be arrived at by taking the aggregate of daily attendances in respect of all working days. Absence for hours only need not be considered. Total attendances on any day should be the total of the attendances on each shift worked during that day. Days on which the factory was closed for whatever cause and days on which the manufacturing processes were not carried on should not be treated as working days.

(*d*) Entries in column (4) should include salaries and wages, cost of living or dearness allowances, overtime earnings and other additional payments. For the purpose of entries in this column no deductions from salaries and wages should be made in respect of items

*If the accounts of the factory are closed more than once in an accounting year, all the dates on which they are closed should be given here; for example, if accounts are closed six-monthly, the dates of both six-monthly closings should be given.

†State here whether 'higher than', 'equal to' or 'lower than', as the case may be.

‡Under this heading should be included all other items of working capital, as, for example, (*a*) cash in hand and at banks, (*b*) stocks of partly finished products, (*c*) net balance (*plus* or *minus* as the case may be) obtained after deducting the total of credit items from the total of debit items. The credit items should be items like debts due to the factory, advances by the factory against goods or to employees, bills of exchange payable to the factory and the debit items should be items like amounts due for goods supplied to the factory, loans and bills of exchange payable by the factory.

specified under clauses (*d*) to (*j*) of sub-section (2) of section 7 of the Payment of Wages Act, 1936. The remuneration to a proprietor should be included only if he is actively engaged in the business of the factory and then only to the extent to which it is paid in lieu of salary or wages. His share of the profits of the business should not be included.

(*e*) If for the purpose of entries in column (5), separately figures for each of the side-headings in column (1) are not available, the total money value of the privileges, benefits or contributions may be entered in the space provided for 'total'. The items of privileges or benefits or contributions included should be specified at the top of column (5).

(*f*) (*i*) "Worker" means a person employed for wages in any manufacturing processes or in cleaning any part of the machinery or premises used for the manufacturing processes, or in any other kind of work whatsoever incidental to or connected with the manufacturing processes or connected with the subject of the manufacturing processes, but does not include any person solely employed in clerical capacity in any room or place where no manufacturing process is being carried on [see also paragraph (*a*) above].

(*ii*) "Persons other than workers" should include all employees not covered by the term "worker" as defined in paragraph (*f*) (*i*), including clerical, administrative and technical staff, whether working in the factory premises or any other place and whose salaries and wages are debitable to the factory's account [see also paragraph (*a*) above].

(*g*) "Adult" means a person who has completed the seventeenth year of age. The expression includes any person who has completed the fifteenth but not the seventeenth year of age and has been certified to be an "adult" under the Factories Act, 1934.

(*h*) "Child" means a person who has not completed the fifteenth year of age and includes any person who has completed the fifteenth but not the seventeenth year of age and has not been certified to be an "adult" under the Factories Act, 1934.

(*i*) Particulars relating to "workers" employed through contractors should be entered as far as they are available with the person submitting the return. If no particulars relating to "workers" employed through contractors are available, the entries against the side-heading 'Employed through contractors' should be "not available" in the relevant columns.

(*j*) If any class of "workers"—'men', 'women', 'boys' and 'girls'—was not employed during the year, the entry against that class of workers in columns (2) to (5) should be 'nil'. Spaces in columns (2) to (5) should not be left blank against any side-heading. Figures in columns (4) and (5) should be entered to the nearest rupee. Fractions should be omitted.

(*b*) *Purchase value.*—For the purpose of determining the purchase value of the quantity of each item of fuel, of electricity and of other items specified in the table, consumed during the year, the purchase value of the quantity purchased during the year should be taken as equal to the cost of the article landed at the factory, or of the electricity transmitted to the factory, *i.e.*, any expenses incurred in transporting the article to the factory should be added to the payment made to the seller unless transport was carried out by the factory's own staff. If any duty was paid by the factory, it should also be added to the cost.

(*c*) Electricity generated or coal gas produced at the factory, if consumed in the factory, should not be included. If any electricity generated or coal gas produced is sold to any person or transferred to allied concerns not covered by this return, such electricity or coal gas should be regarded as a product and its ex-factory net selling value should be included in Part (F).

MATERIALS PURCHASED AT ANY TIME AND CONSUMED DURING THE YEAR ENDING 31ST DECEMBER 19 , IN THE MANUFACTURE OF PRODUCTS AND BY-PRODUCTS MADE FOR SALE AND WORK GIVEN OUT DURING THE SAME YEAR.

Instructions for filling up this Part.

(*a*) *Materials consumed in the year.*—In the table below should be stated the quantity and purchase value of each material [other than those specified in Part (D)] consumed during the year in the manufacture of products and by-products made for sale [as shown in Part (F)]. The table should cover all consumable stores. Only materials which were *purchased*, whether during the year or earlier, should be included. Materials made in the factory should not be included. If the amounts are not directly available from the books of the factory it should be noted that the amounts should cover actual purchases of each material effected during the year *plus* stocks at the beginning of the year and *less* stocks at the end. The value of stocks at the beginning and at the end of the year should be taken at the book value. Purchases made during the year should include materials acquired from allied concerns. The purchase value of such transactions should be taken as equal to the value entered in the books of the factory in respect of which this return is made.

(*b*) *Purchase value*—

(1) For the purpose of determining the purchase value of the quantity of each material consumed during the year for the manufacture of products and by-products made for sale, the purchase value of the quantity of material purchased during the year should be taken as equal to the cost of the material landed at the factory, *i.e.*, any expenses incurred in transporting the material to the factory should be added to the payment made to the seller of the material unless transport was carried out by the factory's own staff. If any duty was paid by the factory, it should also be added to the amount paid to the seller.

(2) If additions specified in paragraph (*b*) (1) to the amount paid to sellers are not available separately for each material, the amount paid to the sellers may be included in the figure of purchase value entered in columns (4), (6) and (8). If this procedure is adopted, (*a*) it should be clearly stated at the top of these columns that the additions specified in paragraph (*b*) (1) have not been made, and (*b*) the following information *must* be furnished in the space provided for the purpose at the bottom of the table (item VII):—

(*ii*) the total amount which should be added to the value of materials as entered in each of the columns (4), (6) and (8) in order to arrive at the purchase value.

(*c*) *Exclusion of merchanted goods.*—Particulars relating to goods which were not subjected to any manufacturing process but were merely bought and re-sold in the same condition as received, should be excluded from the table.

(*d*) *Work given out to other firms or factories (item VI in the table).*—The total amount paid to other firms or factories for work done on materials given out to them *plus* transport and any other charges incurred on these goods should be shown against this item.

(*e*) If a material listed in column (1) was not consumed by the factory, the entry against it should be 'nil'. Spaces in columns (3) to (8) should not be left blank against any item of material listed in column (1). Similarly if no payment was made to other firms or factories for work done on materials given out to them (item VI in the table), the entry against this item should be 'nil'. The space against this item also should not be left blank.

(*f*) Quantity should be stated to the nearest unit specified for each material and purchase value should be stated to the nearest rupee. Fractions should be omitted.

PART (F).

PRODUCTS AND BY-PRODUCTS MADE AND WORK DONE DURING THE YEAR ENDING 31ST DECEMBER 19 .

Instructions for filling up this Part.

(*a*) *Products and by-products made in the year for sale.*—In the table below should be stated the quantity (including the quantity made against specific orders and ex-factory net selling value of each product and by-product *made in the year of return for sale* whether sold in that year or held in stock for sale during a subsequent period. If these amounts are not directly available from the books of the factory, it should be noted that the amounts should cover the actual sales of each product and by-product effected in the year *plus* stocks at the end of the year and *less* stocks at the beginning. The value of stocks at the beginning and at the end of the year should be taken at the book value. The ex-factory net selling value should include cost of packing, materials used (except the cost of returnable cases or other packing). The weight of packing materials should not, however, be included in the figures of weight of products and by-products. Sales effected during the year should include any transfers of products and by-products made to allied concerns or any Government or semi-Government agencies and credit for whose value was secured by book adjustment. Ex-factory net selling value of such transactions should be taken as equal to value entered in the books of the factory in respect of which this return is made.

(*b*) *Ex-factory net selling value*—

(1) For the purpose of determining the ex-factory net selling value of the quantity of each product and by-product made in the year of return for sale, the value of sales to be taken into account should be the amount charged to customers *less* (*i*) discounts or rebates, allowances for returnable cases or other packing and any other drawbacks allowed to customers, and (*ii*) payments to transport firms, railways, etc., for carriage outwards. Charges made for delivery when delivery is carried out by the factory's own staff should not be deducted.

(2) If deductions specified in paragraph (*b*) (1) from the amount charged to customers are not available separately for each product and by-product, the amount charged to customers may be included in the figure of value entered in column (4). If this procedure is adopted, (a) it should be clearly stated at the top of column (4) that deductions from the amount charged to customers specified in paragraph (*b*) (1) have not been made, and (b) the following information must be furnished in the space provided for the purpose at the bottom of the table (item IV):—

(*i*) Names of items which should be deducted [*see* paragraph (*b*) (1) above] from the amount charged to customers in order to arrive at the ex-factory net selling value and which are included in the value as entered, and

(*ii*) The total amount which should be deducted from the value of products and by-products as entered in column (4) in order to arrive at the ex-factory net selling value.

(3) If any product or by-product is not made for sale but for transfer to an allied concern or undertaking and its ex-factory net selling value cannot be given as required above, the value of such product or by-product should be estimated on the basis of materials or parts used or worked up in its manufacture together with due allowance for cost of labour expended on it, general charges and profits allowed, if any.

(*c*) *Electricity generated and coal gas produced at the factory and sold.*—Any electricity generated or coal gas produced at the factory and sold to any person or transferred to allied concerns should be regarded as a product and should be included in the entry against the heading "All other products (value only)" under item "I. Products" for the table.

(*d*) *Exclusions of merchanted goods.*—Particulars relating to goods which were not subjected to any manufacturing process but were merely bought and re-sold in the same condition as received, should be excluded from the table below.

(*e*) *Work done for other firms or customers on materials supplied by them.*—The total amount received for the work *less* (*i*) discount or rebates and other drawbacks allowed to customers, and (*ii*) payments to transport firms, railways, etc., for carriage outwards should be shown against this item.

(*f*) *Repair work (item III).*—The amounts charged for repair work done during the year should be shown against this item, *exclusive of the value of any goods made by the factory and used in the work*, which should be entered against the headings provided for such goods.

(*g*) *Work in progress at the end and at the beginning of the year (items V and VII):*—For the purpose of determining the total output attributable to the year covered by this return, account must be taken of the value of work in progress including repair work, if any, at the end and at the beginning of that year. In both cases the value should be estimated on the basis of materials or parts used or worked up in the construction of plant and machinery, cost of labour expended on them, together with due allowance for general charges and profits.

(*h*) If a product or by-product listed in column (1) was not made by the factory, the entry against it should be 'nil'. Spaces in columns (3) and (4) should not be left blank against any item of product or by-product listed in column (1). Similarly, if no income accrues to the factory under any of the heads listed in items III to V and VII the entry against it should be 'nil'. The spaces against this item also in column (4) should not be left blank.

(*i*) Quantity should be stated to the nearest unit specified for each product and by-product and value should be stated to the nearest rupee. Fractions should be omitted.

If the accounts of the factory are not closed on that date and if it is inconvenient to work out the figures as on that date, all particulars may be given as on the date on which the accounts of the factory were last closed. In either case the date to which the particulars refer and the accounting year of the factory should be clearly stated in the space provided at the top of the table in items (1) and (2).

(*c*) 'Value' in all the headings specified under item "II. Productive capital employed" should be taken to mean value according to the books of the factory on the date to which the particulars furnished in this Part relate. For items of fixed capital this will invariably be the original cost *plus* the cost of improvements made and *less* amount written off. If the factory occupies only a portion of any building or any piece of land, particulars relating to only that portion should be included in the table. If any item of fixed capital [items II (1) (*i*) to II (1) (*iii*)] has been leased or rented, the rent paid should be shown separately in the column provided for this purpose [column (3)] against these items. If any lump sum consideration was originally paid for securing the lease or for renting the item of fixed capital in question, the present book value of the amount originally paid should be included in the amount to be entered in column (2) against the appropriate heading.

(*d*) It should be clearly indicated in item (3) at the top of the table whether book value of fixed capital items as entered in the table has been arrived at by writing off depreciation in respect of the year immediately preceding the date to which the particulars relate at a rate higher than, equal to or lower than the rate of depreciation prescribed under section 10 (2) (*vi*) of the Indian Income-tax Act, 1922.

PART (C).

PERSONS EMPLOYED, SALARIES AND WAGES PAID AND OTHER CONTRIBUTIONS MADE TO EMPLOYEES DURING THE YEAR ENDING 31ST DECEMBER, 19 .

Instructions for filling up this Part.

(*a*) Particulars in the table below should relate to employees engaged in work connected directly or indirectly with the manufacture of the output as shown in Part (F). All administrative, technical and clerical staff should be included. Employees engaged in effecting delivery of the output should also be included, but persons employed in any retail sales organization maintained by the factory should be excluded. If the factory carries on any merchanting trade (*i.e.*, sale of goods which were not subjected to any manufacturing process but merely bought and re-sold in the same condition as received), persons engaged in that part of the business should also be excluded.

(*b*) (*i*) The total number of man-hours worked during the year should be obtained by adding the total number of man-hours worked on each day on which the manufacturing processes were carried on in the factory. The total number of man-hours worked on any day on which the manufacturing processes were carried on in the factory should be obtained by multiplying the total attendances during each shift by the number of hours that shift was worked and adding the product so obtained for all shifts worked on that day.

(*ii*) Entries in column (2) against each of the side-headings 'men', 'women', 'boys' and 'girls' under "Workers" should be worked out in the manner described in paragraph (*b*) (*i*), but based on the attendances of 'men', 'women', 'boys' and 'girls' respectively.

(*c*) The average number of persons employed per day [column (3)] should be worked out by dividing the aggregate total attendances on all working days by the total number of working days during the year. In reckoning attendances, attendances by *budli* or substitution and temporary as well as permanent employees should be counted. Total attendances should be arrived at by taking the aggregate of daily attendances in respect of all working days. Absence for hours only need not be considered. Total attendances on any day should be the total of the attendances on each shift worked during that day. Days on which the factory was closed for whatever cause and days on which the manufacturing processes were not carried on should not be treated as working days.

(*d*) Entries in column (4) should include salaries and wages, cost of living or dearness allowances, overtime earnings and other additional payments. For the purpose of entries in this column no deductions from salaries and wages should be made in respect of items

*If the accounts of the factory are closed more than once in an accounting year, all the dates on which they are closed should be given here; for example, if accounts are closed six-monthly, the dates of both six-monthly closings should be given.

†State here whether 'higher than', 'equal to' or 'lower than', as the case may be.

‡Under this heading should be included all other items of working capital, as, for example, (*a*) cash in hand and at banks, (*b*) stocks of partly finished products, (*c*) net balance (*plus* or *minus* as the case may be) obtained after deducting the total of credit items from the total of debit items. The credit items should be items like debts due to the factory, advances by the factory against goods or to employees, bills of exchange payable to the factory and the debit items should be items like amounts due for goods supplied to the factory, loans and bills of exchange payable by the factory.

specified under clauses (*d*) to (*j*) of sub-section (*2*) of section 7 of the Payment of Wages Act, 1936. The remuneration to a proprietor should be included only if he is actively engaged in the business of the factory and then only to the extent to which it is paid in lieu of salary or wages. His share of the profits of the business should not be included.

(*e*) If for the purpose of entries in column (5), separate figures for each of the side headings in column (1) are not available, the total money value of the privileges, benefits or contributions may be entered in the space provided for 'total'. The items of privileges or benefits or contributions included should be specified at the top of column (5).

(*f*) (*i*) "Worker" means a person employed for wages in any manufacturing processes or in cleaning any part of the machinery or premises used for the manufacturing processes, or in any other kind of work whatsoever incidental to or connected with the manufacturing processes or connected with the subject of the manufacturing processes, but does not include any person solely employed in clerical capacity in any room or place where no manufacturing process is being carried on [see also paragraph (*a*) above].

(*ii*) "Persons other than workers" should include all employees not covered by the term "worker" as defined in paragraph (*f*) (*i*), including clerical, administrative and technical staff, whether working in the factory premises or any other place and whose salaries and wages are debitable to the factory's account [see also paragraph (*a*) above].

If any duty was paid by the factory, it should also be added to the cost.

(*c*) Electricity generated or coal gas produced at the factory, if consumed in the factory, should not be included. If any electricity generated or coal gas produced is sold to any person or transferred to allied concerns not covered by this return, such electricity or coal gas should be regarded as a product and its ex-factory net selling value should be included in Part (F).

(*d*) If any quantity of any article specified in this table was sold in the same condition as bought, particulars relating to it should be excluded from the table.

PART (E).

MATERIALS PURCHASED AT ANY TIME AND CONSUMED DURING THE YEAR ENDING 31st DECEMBER 19 . IN THE MANUFACTURE OF PRODUCTS AND BY-PRODUCTS MADE FOR SALE AND WORK GIVEN OUT DURING THE SAME YEAR.

Instructions for filling up this Part.

(*a*) *Materials consumed in the year.*—In the table below should be stated the quantity and purchase value of each material [other than those specified in Part (D)] consumed during the year in the manufacture of products and by-products made for sale [as shown in Part (F)]. The table should cover all consumable stores. Only materials which were *purchased*, whether during the year or earlier, should be included. Materials made in the factory should not be included. If the amounts are not directly available from the books of the factory it should be noted that the amounts should cover actual purchases of each material effected during the year *plus* stocks at the beginning of the year and *less* stocks at the end. The value of stocks at the beginning and at the end of the year should be taken at the book value. Purchases made during the year should include materials acquired from allied concerns. The purchase value of such transactions should be taken as equal to the value entered in the books of the factory in respect of which this return is made.

(*b*) *Purchase value*—

(1) For the purpose of determining the purchase value of the quantity of each material consumed during the year for the manufacture of products and by-products made for sale, the purchase value of the quantity of material purchased during the year should be taken as equal to the cost of the material landed at the factory, *i.e.*, any expenses incurred in transporting the material to the factory should be added to the payment made to the seller of the material unless transport was carried out by the factory's own staff. If any duty was paid by the factory, it should also be added to the amount paid to the seller.

(2) If additions specified in paragraph (*b*) (1) to the amount paid to sellers are not available separately for each material, the amount paid to the sellers may be included in the figure of purchase value entered in columns (4), (6) and (8). If this procedure is adopted, (*a*) it should be clearly stated at the top of these columns that the additions specified in paragraph (*b*) (1) have not been made, and (*b*) the following information *must* be furnished in the space provided for the purpose at the bottom of the table (item VII):—

(*i*) Names of items which should be added to the value [see paragraph (*b*) (1) above] to the amount paid to sellers in order to arrive at the purchase value and which are not included in the value as entered, and

(*ii*) the total amount which should be added to the value of materials as entered in each of the columns (4), (6) and (8) in order to arrive at the purchase value.

(*c*) *Exclusion of merchanted goods.*—Particulars relating to goods which were not subjected to any manufacturing process but were merely brought and re-sold in the same condition as received, should be excluded from the table.

(*d*) *Work given out to other firms or factories* (*item VI in the table*).—The total amount paid to other firms or factories for work done on materials given out to them *plus* transport and any other charges incurred on these goods should be shown against this item.

(*e*) If a material listed in column (1) was not consumed by the factory, the entry against it should be 'nil'. Spaces in columns (3) to (8) should not be left blank against any item of material listed in column (1). Similarly if no payment was made to other firms or factories for work done on materials given out to them (item VI in the table), the entry against this item should be 'nil'. The space against this item also should not be left blank.

(*f*) Quantity should be stated to the nearest unit specified for each material and purchase value should be stated to the nearest rupee. Fractions should be omitted.

PART (F).

PRODUCTS AND BY-PRODUCTS MADE AND WORK DONE DURING THE YEAR ENDING 31ST DECEMBER 19 .

Instructions for filling up this Part.

(*a*) *Products and by-products made in the year for sale.*—In the table below should be stated the quantity (including the quantity made against specifications) and ex-factory net selling value of each product and by-product *made in the year of return for sale*, whether sold in that year or held in stock for sale during a subsequent period. If these amounts are not directly available from the books of the factory, it should be noted that the amounts should cover the actual sales of each product and by-product effected in the year *plus* stocks at the end of the year and *less* stocks at the beginning. The value of stocks at the beginning and at the end of the year should be taken at the book value. The ex-factory net selling value should include cost of packing materials used (except the cost of returnable cases or other packing). The weight of packing materials should not, however, be included in the figures of weight of products and by-products. Sales effected during the year should include any transfers of products and by-products made to allied concerns and credit for whose value was secured by book adjustment. Ex-factory net selling value of such transactions should be taken as equal to value entered in the books of the factory in respect of which this return is made.

(*b*) *Ex-factory net selling value*—

(1) For the purpose of determining the ex-factory net selling value of the quantity of each product and by-product made in the year of return for sale, the value of sales to be taken into account should be the amount charged to customers *less* (*i*) discounts or rebates, allowances for returnable cases or other packing and any other drawbacks allowed to customers, and (*ii*) payments to transport firms, railways, etc., for carriage outwards. Charges made for delivery when delivery is carried out by the factory's own staff should not be deducted.

(2) If deductions specified in paragraph (*b*) (1) from the amount charged to customers are not available separately for each product and by-product, the amount charged to customers may be included in the figure of value entered in column (4). If this procedure is adopted, (*a*) it should be clearly stated at the top of column (4) that deductions from the amount charged to customers specified in paragraph (*b*) (1) have not been made, and (*b*) the following information *must* be furnished in the space provided for the purpose at the bottom of the table (item IV):—

(*i*) Names of items which should be deducted [*see* paragraph (*b*) (1) above] from the amount charged to customers in order to arrive at the ex-factory net selling value and which are included in the value as entered, and

(*ii*) The total amount which should be deducted from the value of products and by-products as entered in column (4) in order to arrive at the ex-factory net selling value.

(*c*) *Electricity generated and coal gas produced at the factory and sold.*—Any electricity generated or coal gas produced at the factory and sold to any person or transferred to allied concerns should be regarded as a product and should be included in the entry against the heading "All other products (value only)" under item "I. Products" of the table.

(*d*) *Exclusion of merchanted goods.*—Particulars relating to goods which were not subjected to any manufacturing process but were merely bought and re-sold in the same condition as received, should be excluded from the table below.

(*e*) *Work done for other firms or customers on material supplied by them.*—The total amount received for the work *less* (*i*) discount or rebates and other drawbacks allowed to customers, and (*ii*) payments to transport firms, railways, etc., for carriage outwards should be shown against this item.

(*f*) If a product or by-product listed in column (1) was not made by the factory, the entry against it should be "nil". Spaces in columns (3) and (4) should not be left blank against any item of product or by-product listed in column (1). Similarly, if no work was done for other firms or customers on materials supplied by them (item III in the table), the entry against this item in column (4) should be "nil". The space against this item also in column (4) should not be left blank.

(*g*) Quantity should be stated to the nearest unit specified for each product and by-product and value should be stated to the nearest rupee. Fractions should be omitted.

(*c*) 'Value' in all the headings specified under item "II. Productive capital employed" should be taken to mean value according to the books of the factory on the date to which the particulars furnished in this Part relate. For items of fixed capital this will invariably be the original cost *plus* the cost of improvements made and *less* amount written off. If any item of fixed capital [items II (1) (*i*) to II (1) (*iii*)] has been leased or rented, the rent paid should be shown separately in the column provided for this purpose [column (3)] against these items. If any lump sum consideration was originally paid for securing the lease or for renting the item of fixed capital in question, the present book value of the amount originally paid should be included in the amount to be entered in column (2) against the appropriate heading.

(*d*) It should be clearly indicated in item (3) at the top of the table whether book value of fixed capital items as entered in the table has been arrived at by writing off depreciation in respect of the year immediately preceding the date to which the particulars relate at a rate higher than, equal to or lower than the rate of depreciation prescribed under section 10 (*2*) (*vi*) of the Indian Income-tax Act, 1922.

PERSONS EMPLOYED, SALARIES AND WAGES PAID AND OTHER CONTRIBUTIONS MADE TO EMPLOYEES DURING THE YEAR ENDING 31ST DECEMBER, 19 .

Instructions for filling up this Part.

(*a*) Particulars in the table below should relate to employees engaged in work connected directly or indirectly with the manufacture of the output as shown in Part (F). All administrative, technical and clerical staff should be included. Employees engaged in effecting delivery of the output should also be included, but persons employed in any retail sales organization maintained by the factory should be excluded. If the factory carries on any merchanting trade (*i.e.*, sale of goods which were not subjected to any manufacturing process but merely bought and re-sold in the same condition as received), persons engaged in that part of the business should also be excluded.

(*b*) (*i*) The total number of man-hours worked during the year should be obtained by adding the total number of man-hours worked on each day on which the manufacturing processes were carried on in the factory. The total number of man-hours worked on any day on which the manufacturing processes were carried on in the factory should be obtained by multiplying the total attendances during each shift by the number of hours that shift was worked and adding the product so obtained for all shifts worked on that day.

(*ii*) Entries in column (*2*) against each of the side-headings 'men', 'women', 'boys' and 'girls' under "Workers" should be worked out in the manner described in paragraph (*b*) (*i*), but based on the attendances of 'men', 'women', 'boys' and 'girls' respectively.

(*c*) The average number of persons employed per day [column (3)] should be worked out by dividing the aggregate total attendances on all working days by the total number of working days during the year. In reckoning attendances, attendances by *budli* or substitution and temporary as well as permanent employees should be counted. Total attendances should be arrived at by taking the aggregate of daily attendances in respect of all working days. Absence for hours only need not be considered. Total attendances on any day should be the total of the attendances on each shift worked during that day. Days on which the factory was closed for whatever cause and days on which the manufacturing processes were not carried on should not be treated as working days.

(*d*) Entries in column (4) should include salaries and wages, cost of living or dearness allowances, overtime earnings and other additional payments. For the purpose of entries in this column no deductions from salaries and wages should be made in respect of items

*If the accounts of the factory are closed more than once in an accounting year, all the dates on which they are closed should be given here; for example, if accounts are closed six-monthly, the dates of both six-monthly closings should be given.

†State here whether 'higher than', 'equal to' or 'lower than', as the case may be.

‡Under this heading should be included all other items of working capital, as, for example, (*a*) cash in hand and at banks, (*b*) stocks of partly finished products, (*c*) net balance (*plus* or *minus* as the case may be) obtained after deducting the total of credit items from the total of debit items. The credit items should be items like debts due to the factory, advances by the factory against goods or to employees, bills of exchange payable to the factory and the debit items should be items like amounts due for goods supplied to the factory, loans and bills of exchange payable by the factory.

specified under clauses (*d*) to (*j*) of sub-section (*2*) of section 7 of the Payment of Wages Act, 1936. The remuneration to a proprietor should be included only if he is actively engaged in the business of the factory and then only to the extent to which it is paid in lieu of salary or wages. His share of the profits of the business should not be included.

(*e*) If for the purpose of entries in column (5), separate figures for each of the side headings in column (1) are not available, the total money value of the privileges, benefits or contributions may be entered in the space provided for 'total'. The items of privileges or benefits or contributions included should be specified at the top of column (5).

(*f*) (*i*) "Worker" means a person employed for wages in any manufacturing processes or in cleaning any part of the machinery or premises used for the manufacturing processes, or in any other kind of work whatsoever incidental to or connected with the manufacturing processes or connected with the subject of the manufacturing processes, but does not include any person solely employed in clerical capacity in any room or place where no manufacturing process is being carried on [see also paragraph (*a*) above].

(*ii*) "Persons other than workers" should include all employees not covered by the term "worker" as defined in paragraph (*f*) (*i*), including clerical, administrative and technical staff, whether working in the factory premises or any other place and whose salaries and wages are debitable to the factory's account [see also paragraph (*a*) above].

(*g*) "Adult" means a person who has completed the seventeenth year of age. The expression includes any person who has completed the fifteenth but not the seventeenth year of age and has been certified to be an "adult" under the Factories Act, 1934.

(*h*) "Child" means a person who has not completed the fifteenth year of age and includes any person who has completed the fifteenth but not the seventeenth year of age and has not been certified to be an "adult" under the Factories Act, 1934.

(*i*) Particulars relating to "workers" employed through contractors should be entered as far as they are available with the person submitting the return. If no particulars relating to "workers" employed through contractors are available, the entries against the side heading 'Employed through contractors' should be "not available" in the relevant columns.

(*j*) If any class of "workers"—'men', 'women', 'boys' and 'girls'—was not employed during the year, the entry against that class of workers in columns (2) to (5) should be 'nil'. Spaces in columns (2) to (5) should not be left blank against any side-heading. Figures in columns (4) and (5) should be entered to the nearest rupee. Fractions should be omitted.

If any duty was paid by the factory, it should also be added to the cost.

(*c*) Electricity generated or coal gas produced at the factory, if consumed in the factory, should not be included. If any electricity generated or coal gas produced is sold to any person or transferred to allied concerns not covered by this return, such electricity or coal gas should be regarded as a product and its ex-factory net selling value should be included in Part (F).

The table should cover all consumable stores. Only materials which were *purchased*, whether during the year or earlier, should be included. Materials made in the factory should not be included. If the amounts are not directly available from the books of the factory it should be noted that the amounts should cover actual purchases of each material effected during the year *plus* stocks at the beginning of the year and *less* stocks at the end. The value of stocks at the beginning and at the end of the year should be taken at the book value. Purchases made during the year should include materials acquired from allied concerns. The purchase value of such transactions should be taken as equal to the value entered in the books of the factory in respect of which this return is made.

If any duty was paid by the factory, it should also be added to the amount paid to the seller.

(2) If additions specified in paragraph (*b*) (1) to the amount paid to sellers are not available separately for each material, the amount paid to the sellers may be included in the figure of purchase value entered in columns (4), (6) and (8). If this procedure is adopted, (*a*) it should be clearly stated at the top of these columns that the additions specified in paragraph (*b*) (1) have not been made, and (*b*) the following information *must* be furnished in the space provided for the purpose at the bottom of the table (item VII):—

(*d*) *Work given out to other firms or factories (item VI in the table).*—The total amount paid to other firms or factories for work done on materials given out to them *plus* transport and any other charges incurred on these goods should be shown against this item.

(*e*) If a material listed in column (1) was not consumed by the factory, the entry against it should be 'nil'. Spaces in columns (3) to (8) should not be left blank against any item of material listed in column (1). Similarly if no payment was made to other firms or factories for work done on materials given out to them (item VI in the table), the entry against this item should be 'nil'. The space against this item also should not be left blank.

(*f*) Quantity should be stated to the nearest unit specified for each material and purchase value should be stated to the nearest rupee. Fractions should be omitted.

Instructions for filling up this Part.

(*a*) *Products and by-products made in the year for sale.*—In the table below should be stated the quantity and ex-factory net selling value of each product and by-product *made in the year of return for sale*, whether sold in that year or held in stock for sale during a subsequent period. If these amounts are not directly available from the books of the factory, it should be noted that the amounts should cover the actual sales of each product and by-product effected in the year *plus* stocks at the end of the year and *less* stocks at the beginning. The value of stocks at the beginning and at the end of the year should be taken at the book value. The ex-factory net selling value should include cost of packing materials used (except the cost of returnable cases or other packing). The weight of packing materials should not, however, be included in the figures of weight of products and by-products. Sales effected during the year should include any transfers of products and by-products made to allied concerns and credit for whose value was secured by book adjustment. Ex-factory net selling value of such transactions should be taken as equal to value entered in the books of the factory in respect of which this return is made.

(*b*) *Ex-factory net selling value*—

(1) For the purpose of determining the ex-factory net selling value of the quantity of each product and by-product made in the year of return for sale, the value of sales to be taken into account should be the amount charged to customers *less* (*i*) discounts or rebates, allowances for returnable cases or other packing and any other drawbacks allowed to customers, and (*ii*) payments to transport firms, railways, etc., for carriage outwards. Charges made for delivery when delivery is carried out by the factory's own staff should not be deducted.

(2) If deductions specified in paragraph (*b*) (1) from the amount charged to customers are not available separately for each product and by-product, the amount charged to customers may be included in the figure of value entered in column (4). If this procedure is adopted, (a) it should be clearly stated at the top of column (4) that deductions from the amount charged to customers specified in paragraph (*b*) (1) have not been made and (b) the following information *must* be furnished in the space provided for the purpose at the bottom of the table (item IV):—

(*i*) Names of items which should be deducted [*see* paragraph (*b*) (1) above] from the amount charged to customers in order to arrive at the ex-factory net selling value and which are included in the value as entered, and

(*ii*) The total amount which should be deducted from the value of products and by-products as entered in column (4) in order to arrive at the ex-factory net selling value.

(*c*) *Electricity generated and coal gas produced at the factory and sold.*—Any electricity generated or coal gas produced at the factory and sold to any person or transferred to allied concerns should be regarded as a product and should be included in the entry against the heading "All other products (value only)"' under item "I. Products" of the table.

(*d*) *Exclusion of merchanted goods.*—Particulars relating to goods which were not subjected to any manufacturing process but were merely bought and re-sold in the same conditions as received, should be excluded from the table below.

(*e*) *Work done for other firms or customers on material supplied by them.*—The total amount received for the work *less* (*i*) discount or rebates and other drawbacks allowed to customers, and (*ii*) payments to transport firms, railways, etc., for carriage outwards should be shown against this item.

(*f*) If a product or by-product listed in column (1) was not made by the factory, the entry against it should be "nil". Spaces in columns (3) and (4) should not be left blank against any items of product or by-product listed in column (1). Similarly, if no work was done for other firms or customers on materials supplied by them (item IV in the table), the entry against this item in column (4) should be "nil". The space against this item also in column (4) should not be left blank.

(*g*) Quantity should be stated to the nearest unit specified for each product and by-product and value should be stated to the nearest rupee. Fractions should be omitted.

"32A. *Penalty for unfair practices.*—Any employer who commits any unfair practice set out in section 28K shall be punishable with fine which may extend to one thousand rupees."

STATEMENT OF OBJECTS AND REASONS.

It has long been felt that with existing conditions in India, there should be some obligation on the part of employers to recognise Trade Unions provided they are truly representative. The Trade Unions Act, 1926, provides for registration of the unions, but there is no obligation on the employer to recognise any registered trade unions. The Royal Commission on Labour pleading for recognition in the spirit as well as in the letter, deprecated obligatory recognition feeling that it would not secure genuine and full recognition which the Commission desired to seek. The position has not, however, improvevd in regard to voluntary recognition by employers. The Bill, therefore, provides for obligatory recognition of representative trade unions. The question as to whether a trade union is representative or not will, in the event of dispute, be considered by an Industrial Court to be set up for the purpose.

2. The Bill specifies certain acts as unfair practices on the part of recognised trade unions and certain other acts as unfair practices on the part of employers. Provision has been made enabling withdrawal of recognition where an unfair practice is committed by the executive or members of a recognised trade union or when the trade union has ceased to be a representative trade union or on the failure of the trade union to submit any return prescribed in the Bill. An unfair practice on the part of an employer has been made an offence punishable with fine.

Registered No. C207

The Calcutta Gazette

THURSDAY, DECEMBER 5, 1946

PART VI—Bills introduced in the Council of State and Legislative Assembly, Reports of Select Committees presented to the Council and Assembly and Bills published under Rule 18 of the Indian Legislative Rules.

GOVERNMENT OF INDIA.

Legislative Assembly Department.

The following Bill was introduced in the Legislative Assembly on the 28th October, 1946:—

L. A. BILL No. 41 OF 1946.

A Bill further to amend the Factories Act, 1934.

WHEREAS it is expedient further to amend the Factories Act, 1934, for the purposes hereinafter appearing; XXV of 1934.

It is hereby enacted as follows:—

Short title.

1. This Act may be called the Factories (Second Amendment) Act, 1946.

Insertion of new section 33A in Act XXV of 1934.

2. In Chapter III of the Factories Act, 1934 (hereinafter referred to as the said Act), after section 33 the following section shall be inserted, namely:—

Power to make rules for the provision of canteen

"33A. (*1*) The Provincial Government may make rules requiring that in any specified factory wherein more than two hundred and fifty workers are ordinarily employed, an adequate canteen shall be provided for the use of the workers

(*2*) Without prejudice to the generality of the foregoing power, such rules may provide for—

(*a*) the date by which such canteen shall be provided;

(*b*) the standards in respect of construction, accommodation, furniture and other equipment of the canteen;

(*c*) the foodstuffs to be served therein and the charges which may be made therefor;

(*d*) representation of the workmen in the management of the canteens;

(*e*) enabling, subject to such conditions, if any, as may be specified, the power to make rules under clause (*c*) to be exercised also by the Chief Inspector."

Amendment of section 34, Act XXV of 1934.

3. In the proviso to section 34 of the said Act, the word "non-seasonal" shall be omitted.

STATEMENT OF OBJECTS AND REASONS.

Canteens in industrial establishments are of inestimable value to workers as well as to managements, as by providing inexpensive and wholesome food to the workers, they promote their health and well-being upon which the productive efficiency and the welfare of trade in which they are engaged largely depend. They also help to create a sense of solidarity among the work-people and a feeling of attachment to their work-place. Moreover, communal feeding makes for a substantial economy in the use of foodstuffs.

2. The development of canteens has not hitherto been sufficiently commensurate with their importance as an essential welfare measure The Government of India consider that legislation alone can produce the desired results.

3. The Bill seeks to add to the Factories Act, 1934, a new section enabling Provincial Governments to make rules requiring specified factories employing more than 250 persons, to set up canteens in conformity with prescribed standards and conditions as regards construction, accommodation, equipment, foodstuffs to be served and the prices to be charged, representation of workmen in the management of the canteen, etc. The subject was discussed at the Seventh Indian Labour Conference in November, 1945. Apart from considerations such as lack of space and inadequate supplies of foodstuffs, to which Provincial Governments will give due consideration before requiring a factory to set up a canteen, the consensus of opinion in the Conference was in favour of legislation.

4. The opportunity is taken of rectifying an omission in the Factories (Amendment) Act, 1946 (X of 1946). The proviso to section 34 of the Factories Act, 1934 (XXV of 1934) states that an adult worker in a non-seasonal factory engaged at work which for technical

reasons must be continuous throughout the day, may work for 56 hours in any week. The proviso was confined to non-seasonal factories obviously because the weekly limit fixed by the section in the case of seasonal factories was then 60 hours. This latter limit was reduced to 50 hours by the amendment to section 34 made by Act X of 1946, but no consequential amendment was made in the proviso to that section. It is therefore proposed to omit the word "non-seasonal" in the proviso to section 34 of the Act.

GOVERNMENT OF INDIA.

Legislative Assembly Department.

The following Bill was introduced in the Legislative Assembly on the 28th October, 1946:—

WHEREAS it is expedient further to amend the Indian Boilers Act, 1923, for the purpose hereinafter appearing; V of 1923.

Application of Act to economisers.

"2B. Every reference in this Act to a boiler or boilers [except in clause (*ccc*) of section 2, clause (*e*) of section 6, clauses (*c*) and (*d*) of section 11, clause (*d*) of section 29 and section 34] shall be deemed to include also a reference to an economiser or economisers, respectively."

"Provided that a certificate issued under this sub-section in respect of an economiser may authorise its use for a period not exceeding twenty-four months."

5. In section 8 of the said Act—

(*i*) to sub-section (*3*) the following proviso shall be added, namely:—

"Provided that where the certificate relates to an economiser, the application for its renewal may be for a period not exceeding twenty-four months.";

(*ii*) to sub-section (*4*) the following further proviso shall be added, namely:—

"Provided further that in the case of an economiser, the owner shall be given not less than thirty days' notice of the date fixed for its examination.";

(*iii*) in sub-section (*5*) in the proviso, after the word "Provided" the word "further" shall be inserted and before the said proviso the following proviso shall be inserted, namely:—

"Provided that a renewed certificate issued under this sub-section in respect of an economiser may authorise its use for a period not exceeding twenty-four months."

STATEMENT OF OBJECTS AND REASONS.

The Indian Boilers Act, 1923, did not originally provide for the inspection and general regulation of the boiler feed water system which is an auxiliary apparatus connected with the boiler. A serious accident occurred in 1942 in the boiler house of the Alexandra and E. D. Sassoon Mills, Bombay, as a result of the explosion of an economiser, a part of the feed water system. The cause for the explosion was weakness of the economiser caused by internal corrosion. Accordingly, provision was made for the inspection of the boiler feed water system by amending the relevant sections of the Indian Boilers Act, 1923 [Indian Boilers (Amendment) Act, 1943 (XVII of 1943)].

When the Act was amended in 1943, the fact that fittings connected to feed pipes would require to be separately registered was not contemplated. Economisers are rarely if ever moved from one boiler or from one set of boilers to another, and it was intended that they should be included in the registration certificates relating to the boiler or boilers to which they were attached in the same way as steam pipes are today, and that the penalties provided for under the Act in the case of steam pipes and their connected fittings should apply to feed pipes and their connected fittings also. The question was further examined in connection with the preparation of draft feed pipe regulations and it was considered that the independent registration of economisers was essential to provide for their satisfactory inspection and safe operation. The amending Bill provides for such independent registration of economisers.

NOTIFICATION.

No. 4076Pl.- 6th December 1946.—Whereas the Governor is satisfied for the reasons hereinafter set forth that the public tranquillity and security of life and property in the Presidency Area are endangered;

Now, therefore, in exercise of the power conferred by section 3 of the Presidency Area (Emergency) Security Act, 1926 (Bengal Act III of 1926), the Governor declares that a state of emergency exists.

Reasons.

The disturbances in the Presidency town of Calcutta, the town of Howrah and parts of the district of the 24-Parganas, which involved very

serious loss of life and property, were due to conditions which have not yet been removed. Feelings of bitterness and suspicion still subsist between Muslims and Hindus. These feelings have been further exacerbated by the recent events in East Bengal and Bihar, and the possibility of a fresh outbreak of communal strife cannot be ignored. The Governor is, therefore, satisfied that a state of emergency exists and that the use of the powers conferred upon him by the Act is necessary to bring it to an end.

By order of the Governor,

P. D. MARTYN,

ORDINANCE No. XXV OF 1946.

AN

ORDINANCE

to impose a temporary duty of excise on certain sugar produced in British India.

WHEREAS an emergency has arisen which makes it necessary to impose a temporary duty of excise on certain sugar produced in British India;

AND WHEREAS the Indian Legislature is not in session;

NOW, THEREFORE, in exercise of the powers conferred by section 72 of the Government of India Act, as set out in the Ninth Schedule to the

Government of India Act, 1935 (26 Geo. 5, c. 2), the Governor General is pleased to make and promulgate the following Ordinance:—

1. *Short title, extent and commencement.*—(*1*) This Ordinance may be called the Sugar (Temporary Excise Duty) Ordinance, 1946

(*2*) It extends to the whole of British India.

(*3*) It shall come into force at once.

2. *Definitions.*—In this Ordinance, unless there is anything repugnant in the subject or context,—

(*a*) "Assessing Officer" and "Circle Officer" mean, respectively, any officer appointed by the Provincial Government or by the Collector of Central Excise having jurisdiction in the area to exercise the powers of an Assessing Officer or a Circle Officer under this Ordinance;

(*b*) "Assistant Collector" means an Assistant Collector of Central Excise and includes any officer specially authorised by the Central Board of Revenue or by the Provincial Government to exercise in any specified area all or any of the powers of the Assistant Collector for the purposes of this Ordinance;

(*c*) "factory" means any premises wherein or within the precincts of which the production of sugar or any process connected with the production of sugar is being or has been carried on with the aid of power on any day of the twelve months preceding the date of the commencement of this Ordinance;

(*d*) "sugar" means any form of sugar containing more than ninety per cent. of sucrose but excludes the following:—

(*i*) Khandsari sugar, that is to say, sugar in the manufacture of which neither a vacuum pan nor a vacuum evaporator is employed;

(*ii*) Palmyra sugar, that is to say, sugar manufactured from jaggery obtained by boiling the juice of the palmyra palm;

(*e*) "wholesale dealer" means any person who buys or sells sugar wholesale and includes a broker or commission agent who in addition to making contracts for the sale or purchase of sugar for others, stocks sugar belonging to others as an agent for the purpose of sale.

3. *Imposition of duty.*—A duty of excise shall be levied, and shall be payable to the Central Government, on all sugar produced in any factory in British India before the commencement of this Ordinance and owned or possessed at the commencement of this Ordinance by an owner of a factory or by a wholesale dealer, at the rate of four rupees and four annas per standard maund.

4. *Disclosure of stocks.*—Every person owning or possessing sugar liable to the duty imposed by section 3 shall, within seven days of the date of the commencement of this Ordinance submit to the Assessing Officer having jurisdiction in the area a full account in writing, containing the particulars entered in Form A set out in the Schedule and verified in the manner indicated in that form, of all sugar in his ownership or possession on the date of the commencement of this Ordinance, and shall specify therein the place where such sugar is stored and, if it is in transit from one place to another, the date, place and manner of despatch, its destination, the name and address of the consignee, and the date on which it is expected to reach such destination.

5. *Assessment and payment of duty.*—(*1*) On receipt of the return referred to in section 4 and after such further enquiry, if any, as he may think necessary, the Assessing Officer shall assess the duty payable on the sugar. If no return is submitted within the period specified in section 4, the Circle Officer, or, if the sum assessed exceeds two hundred rupees, the

Assistant Collector, may at any time make a summary assessment of the duty on such information as may be available to him.

(*2*) The amount so assessed shall be communicated in writing to the person owning or possessing the sugar with the particulars contained in Form B as set out in the Schedule; and that person shall within ten days of such communication, unless he obtains permission under sub-section (*3*) to pay by instalments, pay it into the local Treasury or any other Treasury approved by the Assessing Officer.

(*3*) Such payment may, with the permission of the Assessing Officer obtained when the assessment is communicated under sub-section (*2*), be made in instalments not more than three in number, of which, when three instalments are allowed, the first shall be not less than one-third of the total amount due and shall be paid within ten days of such communication, and the second shall be not less than one-half of the balance due and shall be paid within thirty days thereafter, and the third shall be paid within a further period of thirty days; and, when two instalments are allowed, the first shall be not less than one-half of the total amount due and shall be paid within thirty days of such communication and the second shall be paid within a further period of thirty days.

6. *Recovery of duty with penalty.*—If the duty payable under section 3 is not paid in full within the period allowed or if any instalment is not paid in full by the time fixed by section 5, the Circle Officer, or, if the deficit exceeds one hundred rupees, the Assistant Collector may, in lieu of the amount left unpaid, recover any sum not exceeding double the amount left unpaid.

7. *Mode of recovery of duty.*—When default is made in the payment of any duty payable under section 3, or when any sum is to be recovered under section 6 the Assistant Collector may prepare a certificate signed by him specifying the amount due from the person liable to pay the same and send it to the Collector of the district in which such person resides or conducts his business and the said Collector, on receipt of such certificate, shall proceed to recover from the said person the amount specified therein as if it were an arrear of land revenue.

8. *Power to obtain information.*—An Assessing Officer or any person authorised in writing in this behalf by an Assistant Collector may at all reasonable times enter any place in which he has reason to believe that sugar liable to the duty imposed by section 3 is kept, and may inspect such place and may require any person found therein who is for the time being in charge thereof to produce to him and allow him to examine such accounts, books or other documents as may relate to the business carried on in such place and to furnish to him such information as he may require for the purpose of ascertaining whether or what sugar liable to duty is kept in such place or is elsewhere in the ownership or possession of the owner of such place.

9. *Disposal of sugar liable to duty.*—No person owning or possessing sugar liable to the duty imposed by section 3 shall, except so far as he may be allowed by the Assessing Officer, sell or otherwise dispose of any sugar until the order of assessment under section 5 has been communicated to him and until he holds a release order signed by the officer making the assessment:

Provided that nothing in this section shall apply to sugar sold retail in quantities not exceeding two pounds to one person at one time.

10. *Offences and penalties.*—Whoever commits any of the following offences, namely:—

(*a*) fails to supply the information required by section 4 or under section 8 or (unless with a reasonable belief, the burden of proving which shall be upon him, that the information supplied by him is true) supplies false information,

(*b*) evades the payment of any duty payable by him under this Ordinance,

(*c*) obstructs any Assessing Officer or other authorised person in the exercise of his powers under section 8,

(*d*) contravenes the provisions of section 9,

(*e*) attempts to commit, or abets the commission of, the offences mentioned in the foregoing clauses of this section,

shall, for every such offence, be punishable with imprisonment for a term which may extend to one year, or with fine, or with both, and where the offence is committed, attempted or abetted in respect of sugar liable to duty under section 3 such fine may extend to five times the duty leviable on the sugar in respect of which the offence is committed, attempted or abetted.

11. *Power of Courts to order forfeiture.*—Any Court trying an offence under this Ordinance may order the forfeiture to His Majesty of any sugar in respect of which the Court is satisfied that an offence under this Ordinance has been committed, and may also order the forfeiture of any receptacles, packages or coverings in which such sugar is contained and the animals, vehicles, vessels or other conveyances used in carrying the sugar:

Provided that in ordering forfeiture under this section the Court shall give the owner of the goods an option to pay in lieu of forfeiture such fine as the Court thinks fit.

12. *Appeals.*—(*1*) Any person aggrieved by any decision or order passed under section 5 or section 6 may, within one month from the date of such decision or order, appeal therefrom to the Collector of Central Excise; but no such appeal shall be considered until the amount demanded under section 5 or 6, if payable at the time, has been deposited.

(*2*) The Collector of Central Excise may thereupon make such further inquiry and pass such order as he thinks fit, confirming, altering or annulling the decision or order appealed against; and if the money deposited by the person making the appeal exceeds the amount directed by the Collector of Central Excise to be paid, the money deposited in excess of such amount shall be refunded.

(*3*) Every order passed in appeal under this section shall, subject to the power of revision conferred by section 13, be final.

13. *Revision by the Central Board of Revenue.*—The Central Board of Revenue may, on the application of any aggrieved person, reverse or modify any decision or order made under section 5, 6 or 12.

14. *Copy of Order to be filed.*—Every appeal or application for revision shall be accompanied by a copy of the decision or order by which the appellant or applicant, as the case may be, is aggrieved.

15. *Power to grant exemption and relaxation.*—(*1*) The Central Government may, by notification in the official Gazette, exempt any sugar generally or in any specified area, from the whole or any part of the duty leviable thereon under this Ordinance.

(*2*) The Central Board of Revenue may, by special order in any particular case, exempt any sugar from the payment of the duty in circumstances of an exceptional nature.

16. *Bar of legal proceedings.*—No suit, prosecution or other legal proceeding shall lie against any person for anything in good faith done or intended to be done under this Ordinance.

17. *Saving of other laws.*—Nothing in this Ordinance shall affect the levy of duty on sugar under the Central Excise and Salt Act, 1944 (I of 1944), and the provisions of the said Act shall have no application to the levy of duty under this Ordinance.

Whereas by orders, dated the 18th March 1943, 18th April 1943 and 27th July 1943, the land described in the schedule below was requisitioned under the provisions of sub-rule (*1*) of rule 75A of the Defence of India Rules;

And whereas the said land continues to be subject to requisition under section 3 of the Requisitioned Land (Continuance of Powers) Ordinance, 1946 (Ordinance XIX of 1946);

6.	Workmen whose average daily wages are Rs. 3 and above	3 8 0

2. The sickness cash benefit shall be an amount equivalent to one-half of the sum of the average daily wages as aforesaid for each of the weeks for which contributions were paid in respect of the workman during the period of twenty-six weeks immediately preceding the week in which the claim falls due, divided by twenty-six; provided that where the amount of the benefit so calculated includes a fraction of an anna, it shall be rounded to the next higher anna. The calculation indicated above is illustrated by the following examples:—

Example 1.—If the average daily wages of a workman were 8 annas a day for 10 weeks, 13 annas a day for 10 weeks and Rs. 1-4-0 a day for 6 weeks, the average daily wages during the preceding 26 weeks will be:—

$$\frac{10\times 8+10\times 13+6\times 20}{26}=\frac{18}{26}\text{—annas.}=12\text{—annas.}$$

The sickness cash benefit payable will then be $6^{9}/_{26}$ annas, rounded to the next higher anna, namely, 7 annas a day.

Example 2.—If the workman worked for only 17 weeks in the period of 26 weeks and his average daily wages were 13 annas for 10 weeks and Rs. 1-4-0 for 7 weeks, the average daily wages during the preceding 26 weeks will be:—

$$\frac{10\times 13+7\times 20}{26}=\frac{10}{26}\text{—annas.}=10\text{—annas.}$$

The sickness cash benefit payable will then be $5^{5}/_{26}$ annas a day, rounded to the next higher anna, namely, 6 annas.

Example 3.—If the workman worked for 21 weeks and his average daily wages were Rs. 1-4-0 throughout the period, the average daily wages during the preceding 26 weeks will be:—

$$\frac{20\times 21}{26}=\frac{4}{26}\text{—annas.}=16\text{—annas.}$$

The sickness cash benefit payable will be $8\ ^{2}/_{26}$ annas, rounded to the next higher anna, namely, 9 annas.

3. The sickness cash benefit admissible to a person claiming the benefit during a protected period shall be calculated on the basis of his average daily wages during the twenty-six weeks preceding the week in which the protected period commenced.

4. Disablement benefit and dependants' benefit shall be an amount equivalent to one-half of the sum of the average daily wages for each of the weeks for which contributions were paid in respect of the workman during the period of fifty-two weeks immediately preceding the week in which the claim falls due divided by the number of

weeks for which contributions were so paid, provided that where the amount of the benefit so calculated includes a fraction of an anna, it shall be rounded to the next higher anna. The calculation indicated above is illustrated by the following examples:—

Example 1.—If the average daily wages of a workman are 8 annas a day for 20 weeks, 13 annas a day for 20 weeks and Rs. 1-4-0 a day for 12 weeks the average daily wages during the preceding 52 weeks will be:—

$$\frac{20\times 8+20\times 13+12\times 20}{52}=\frac{18}{26}\text{—annas.}$$

The disablement or dependants' benefit will then be $6^{9}/_{26}$ annas, rounded to the next higher anna, *i.e.*, 7 annas a day.

Example 2.—If the workman works only for 34 weeks in the period of 52 weeks preceding the week in which the claim falls due, and his average daily wages were 13 annas a day for 20 weeks and Rs. 1-4-0 for 14 weeks, the average daily wages during the preceding 52 weeks will be:—

$$\frac{20\times 13+14\times 20}{34}=\frac{30}{34}\text{—annas.}$$

The disablement or dependants' benefit will be $7^{32}/_{34}$ annas, rounded to the next higher anna, namely, 8 annas a day.

Example 3.—If the workman worked for only two weeks during the 52 weeks preceding the week in which the claim falls due, and the average daily wages were Rs. 2-8-0 a day, the average daily wages during the preceding 52 weeks will be:—

$$\frac{2\times 40}{2}=40\text{ annas.}$$

The disablement and dependants' benefit will be 20 annas or Rs. 1-4-0 a day.

The disablement or dependants' benefit calculated as aforesaid shall be called the full rate.

5. The benefit shall be payable to a workman or his dependants qualified or adjudged to be eligible under the Workmen's Compensation Act, 1923, as follows:— VIII of 1923.

(*i*) to a workman—

(*a*) for temporary disablement, during the period of such disablement, at the full rate;

(*b*) for permanent partial disablement, at a percentage of the full rate, as provided in section 4 of the Workmen's Compensation Act, 1923, for life; VIII of 1923.

(*c*) for permanent total disablement, at the full rate for life;

(*ii*) in the case of the death of the workman, to his widow or widows and legitimate children as follows:—

(*a*) to the widow during life or until re-marriage, an amount equivalent to three-fifths of the full rate and, if there are two or more widows, the amount payable to the widows as aforesaid shall be divided equally between the widows;

(*b*) to each legitimate son, an amount equivalent to two-fifths of the full rate until he attains eighteen years of age;

(*c*) to each legitimate daughter, an amount equivalent to two-fifths of the full rate until she attains eighteen years of age or until marriage, whichever is earlier:

Provided that if the total of the dependants' benefits distributed among the widow or widows and legitimate children of the deceased workman as aforesaid exceeds the full rate, the share of each of the dependants shall be proportionately reduced, so that the total amount payable to them does not exceed the amount of disablement benefit at the full rate.

6. In case the deceased workman does not leave a widow or legitimate child, dependants' benefit at such rates as may be determined by the Commissioner appointed under

the Workmen's Compensation Act, 1923, shall be payable as follows:— 1923.

(a) to a parent or grand parent, for life;
(b) to any other male dependant, until he attains eighteen years of age;
(c) to any other female dependant, until she attains eighteen years of age or until marriage, whichever is earlier, or if widowed, until she attains eighteen years of age.

7. The sickness cash benefit calculated under paragraphs 2 and 3 and the disablement or dependants' benefit calculated under paragraph 4 shall be subject to a minimum of 4 annas a day and a maximum of Rs. 1-12-0 a day.

STATEMENT OF OBJECTS AND REASONS.

1. The introduction of a scheme of Health Insurance for Industrial Workers has been under the consideration of the Government of India for a long time. The necessity for such a scheme has become more urgent in view of the conditions brought about by war. The scheme envisaged is one of compulsory state insurance providing for certain benefits in the event of sickness, maternity and employment injury to workmen employed in or in connection with work in factories other than seasonal factories.

2. A scheme of this nature has to be planned on an all-India basis and administered uniformly throughout the country. With this object, the administration of the scheme is proposed to be entrusted to a Corporation constituted by central legislation.

3. The functions of the Corporation will be performed by a Central Board constituted of representatives of 'Central and Provincial Governments, and of employers,' workers and the medical profession. The Board will also include certain members elected by the Central Legislative Assembly. A Standing Committee of the Board will act as the Executive of the Board, and a Medical Benefit Council will also be set up to advise on matters relating to the administration of medical benefit.

4. The insurance fund will be mainly derived from contributions from employers and workmen. The contributions payable in respect of each workman will be based on his average wages and will be payable in the first instance by the employer. The employer will be entitled to recover the workman's share from the wages of the workmen concerned. Workmen whose earnings do not exceed 10 annas a day will be totally exempt from payment of any share of the contribution, the entire contribution on account of such workmen being met by employer. Provision has been made for the preparation of proper budgets and the audit of accounts.

5. The insured workman will be entitled to the following benefits—

(a) *Sickness Cash Benefit.*—A workman, if certified sick and incapable of working, will receive for a period not exceeding 8 weeks in any continuous 12 monthly period, a cash allowance equal approximately to half his average daily wages during previous six months. He will also be entitled to receive medical care and treatment at such hospitals, dispensaries or other institutions to which the factory in which he is employed may be allotted.

(b) *Maternity Benefit.*—Woman workers will be entitled to receive a maternity benefit at 12 annas a day for 12 weeks. They will also be entitled to medical aid at the aforesaid medical institutions.

(c) *Disablement and Dependents' Benefits.*—A workman disabled by employment injury will receive, for the period of disablement or life depending on whether the disablement is temporary or full and permanent as the case may be, a monthly pension equivalent to half his average wages during the previous twelve months, subject to a maximum and minimum. Where disablement is partial, the pension will be proportionately reduced. In case of death resulting from employment injury, the pension will be payable to the widow or widows, minor sons and minor and unmarried daughters, or in case there are no widow and legitimate children, to other dependants, of the deceased workman. The workman will also be entitled to medical care and treatment.

6. Medical care and treatment to insured workmen will be provided by Provincial Governments at such hospitals, dispensaries and other institutions as may be prescribed for the purpose. The cost of the medical benefit will be shared between the Provincial Government and the Corporation in such proportions as may be agreed upon between them. In case the average incidence of sickness cash benefit in any Province is in excess of the all-India average, Provincial Government will also bear such share of the cost of the excess incidence as may be agreed upon between it and the Corporation.

7. Workman's State Insurance Courts will be set up to decide disputes and adjudicate on claims. The cost of the tribunal will be paid by the insurance fund.

8. Central Government will make rules on matters relating to the administration of the Corporation, such as nomination and election of members of the Board, Standing Committee, Medical Benefit Council, powers and duties of the principal officers, raising of loans, investment of funds, accounts to be maintained by the Corporation, their audit and publication. Provincial Government will make rules on matters relating to the workmen's insurance courts to be set up under the Act, establishment of hospitals, dispensaries, medical institutions, etc., and the scale of medical benefit to be provided to insured persons. The Board will make regulations on matters relating to the working of the scheme, *e.g.*, collection of contributions, payment of benefits, returns and other particulars to be submitted by employers in respect of workmen employed by them, the conditions to be observed by insured persons in receipt of benefits, etc.

9. The Bill makes detailed provisions in regard to the above matters. As the clauses are self-explanatory, Notes on Clauses have not been appended.

DIRECTORATE OF AGRICULTURE, BENGAL

First Forecast of the Cotton Crop of Bengal for 1946-47.

Calcutta, the 10th August 1946.

(*Note.*—On an average of the five years ending 1944-45, the area under cotton in Bengal to which this forecast relates, has represented some 0·4 per cent. and that in the Bengal States some 0·1 per cent. of the total area under cotton in India.)

There are two varieties of cotton grown in this part of the country, viz., the early and the late. The early crop is chiefly grown in the Chittagong Hill Tracts and in the Tripura State and to a small extent in other districts. The late variety is grown in small areas in Bankura, Midnapore and Mymensingh.

Character of the season.—The weather and its effect on the cultivation and growth of the crop in Bengal (excluding the Chittagong Hill Tracts for which no return has yet been received) have been favourable, and the present condition of the crop is fair.

Area sown.—The total area sown this year under early cotton is estimated at 117,160 acres, as against 117,310 acres and 117,343 acres returned in the corresponding and the final forecasts respectively of last year. The present estimate includes the last year's final forecast figures for the Chittagong Hill Tracts and the Tripura State for which no returns have been received due to strike in the Posts and Telegraphs Department. No area has so far been sown with the late variety. The area under this variety was 50 acres last year.

Director of Agriculture, Bengal.

W. M. CLARK,
Additional Director of Agriculture
for *Director of Agriculture, Bengal.*

DIRECTORATE OF AGRICULTURE, BENGAL.

Calcutta, the 15th May 1946.

The Fourth and Final Forecast of the Wheat Crop of Bengal for 1945-46.

(*Note.*—On an average of the five years ending 1943-44, the area under wheat in Bengal has represented some 0·5 per cent. of the total area under wheat in India. The ratio of the irrigated wheat acreage to the total wheat acreage (*a*) in British India and (*b*) in Bengal has, in the five years ending 1943-44, averaged (*a*) 48·0 per cent. and (*b*) 7·0 per cent. respectively.)

Character of the season.—Since the submission of the third forecast, the weather and its effect on the crop have not improved. There has been some damage due to continued drought in most of the districts.

Acreage.—The total area sown with the crop is estimated at 201,700 acres this year, as against 201,800 acres (revised) of the last year, as found by plot to plot crop survey conducted by the Development Commissioner, Bengal.

Outturn.—The provincial outturn is estimated at 63 per cent. of the normal this year, as against 71 per cent. of the normal last year.

Total yield.—Taking 9 maunds as the normal yield per acre, the gross yield of the crop for the province works out to 42,000 tons this year, as against 47,400 tons (revised) of the last year.
